Hurricane Jeanne Strikes and ntb group Responds

ntb group, LLC of Vero Beach, Florida is a personal and business data recovery and mitigation company. When Hurricane Jeanne struck the Florida Treasure Coast only 3 weeks after Hurricane Frances, the ntb group team responded again. Paula Lerner and Paul Seldes worked on Red Cross feeding trucks to make sure that impacted residents had food and water in the days immediately after the storm.

“It was good to be able to see people and provide immediate help after Jeanne passed. Many streets and roads were still flooded. We went into some areas before any other rescue personnel got there”, said Lerner, “People applauded the Red Cross trucks and actually hugged us when we gave them MREs and water”.

ntb group principals continue to work with the American Red Cross in Indian River County. ntb is a proud supporter of the Red Cross and a portion of all October revenue will be donated to the Treasure Coast chapter of the Red Cross for local disaster relief.

ntb continues to help businesses recover their data and systems. ntb works with clients to prepare for and mitigate disaster related risks. For more information contact Paula Lerner at 772-538-1921 or email Paula at paula@ntb-group.com. Until December 1st, 2004, ntb group is offering local businesses 30-50 percent discounts from ntb’s standard rates to assist in recovery.
