ntb group LLC is pleased to announce that it is now certified to deliver official FEMA/Department of Homeland Security training programs for NIMS (National Incident Management System) and ICS (Incident Command Systems). ntb can provide complete instructor based, classroom training for the entire FEMA series, tailored for your organization, industry, or locality.

NIMS and ICS are the cornerstone for comprehensive government and government disaster related operations. With NIMS and ICS, disparate organizations have a baseline to coordinate an emergency response. The use of NIMS and ICS is mandated by presidential directive and required by most government entities as well as hospitals.

ntb group remains on the front lines of emergency response and emergency responder training. The ntb team has worked on some of the largest events in US history. ntb resources were on the ground in NY on 9-11-2001, responded to the 2004 Florida Hurricanes, running missions in Mississippi after Katrina in 2005 and in New Orleans for the 2008 Gustav evacuation.

Contact Paula Lerner at ntb group to help you create a disaster plan for your business or community, plan for disaster mitigation and recovery at paula@ntb-group.com or 772.538-1921. ntb group LLC is a woman owned small business located in Vero Beach, Florida focusing on public safety, homeland security, and technology related services.
